Our Name is coming from Sirius: The Brightest Star in the Sky

Sirius is the brightest star in the night sky. Its name is derived from the Greek word Σείριος (Latin script: Seirios), meaning lit. 'glowing' or 'scorching'. The star is designated α Canis Majoris, Latinized to Alpha Canis Majoris, and abbreviated α CMa or Alpha CMa.

Our Mission

Xrius Game Story

"Xrius Chasing Crypto Tokens"

Once upon a time in the digital world of Cyberspace, a brave adventurer named Aria set out on a quest to find the legendary Prius Tokens. Upon hearing that these tokens possess immense power and grant their possessor unique abilities in the virtual world, Aria's greatest adventure began.

Aria's journey began in the Enchanted Code Forest, where she encountered complex mazes guarded by elusive AI coding creatures. With each labyrinth successfully traversed, Aria earned a valuable Xrius Token, bringing her one step closer to unlocking the ultimate prize.

As Aria travelled deeper into the virtual world's landscapes, she encountered challenges such as the Grok Firewall Fortress and the Binary Bitcoin Bridge, where every step had to be carefully considered. Along the way, she met fellow AI-powered bots and formed alliances to overcome complex puzzles designed to protect her hard-collected and coveted Xrius Tokens.

Aria's journey grew more difficult as she levelled up, as she encountered malware elemental minions - mischievous beings who didn't want her to win the game. With cunning strategy, a sense of adventure, and quick thinking, she defeated these enemies to protect herself and her precious Xrius tokens.

As the missions progressed, Aria uncovered the secrets of the algorithmic archives, where the key to unlocking the true potential of the Xrius Tokens lay hidden in old mission scenarios. It became clear that the power within these tokens was not only a tool for personal advancement, but also a force for good in the virtual realm.

Finally, after facing the final quest challenge in the Quantum Fortress, the doors to the new virtual world were opened and the heroine Aria was revealed.
